

Product Design and Engineering Company

RF/ Photonics/ Fiber Optics

FNE is an engineering and technology consulting company established in 1998 specializing in custom product development in the area of fiber optic communications components, sub systems and systems.

Over 70 companies have utilized our services ranging from large fortune 500 companies to start-ups. The value proposition is our ability to rapidly engage with highly professional, experienced and competent, engineers, scientists, technical managers and technicians.

FNE looks for opportunities to add value to our clients. Our expertise covers the entire product life cycle, from concept creation, requirements analysis, product design and development, design for manufacturing, new product introduction into the manufacturing process, design verification testing, processes development, technical sales, field support and sustained engineering.

If your company is in need of custom products, engineering and or product development assistance, feel free to contact us at the following phone number:

Phone: 1-650-726-2639

Or via email: marcus@fn-eng.com

Sincerely, Marcus Nebeling, CTO
